TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), C, C++, Java
- **Web/Mobile Development:** React, Node.js, Express.js, HTML5/CSS3, Vite, REST API, React Native, Expo
- **Database & Auth:** MySQL, JWT, Google OAuth 2.0, Cloudflare Turnstile, Supabase, WatermelonDB
- **Tools & Platforms:** Vercel, Railway, n8n, Git, GitHub, Microsoft/Google/Adobe Suite, Figma, Canva
- **Hardware & Systems:** Computer assembly, Windows/Ubuntu setup, network troubleshooting

PROFESSIONAL EXPERIENCE

Internship

Feb 2026 – Apr 2026

Associated Labor Unions – Luzon

Junior IT Personnel & Web Developer

- Developed LaborConnect, a full-stack labor union management system featuring membership management, venue booking, ticketing, and workflow automation modules.
- Resolved hardware, software, and network issues for employees, improving operational continuity and reducing technical downtime.
- Collaborated with senior IT personnel on troubleshooting, system maintenance, and web application development initiatives.

Freelance

2019 – Present

Self-Employed

Technical Support & Designer

- Executed computer building commissions, complete Windows/Ubuntu operating system configurations, and routine hardware troubleshooting.
- Designed compelling marketing materials, including digital assets and physical prints for local businesses and clothing brands.
- Edited multimedia projects and short films, achieving the "Best Video Edit" award in 2024 for exceptional post-production quality.
- Developed RDS AutoBill, offline-first desktop sales invoicing application for a local pharmaceutical distributor in Bulacan to streamline daily operations and eliminate manual calculation errors.

FEATURED PROJECTS

Abono

Jun 2026 – Present

Group Expense Tracker App (Mobile App & Website)

Full-Stack Developer (Solo)

- Engineered a premium, offline-first mobile application using React Native, Expo, and WatermelonDB, enabling seamless group expense tracking and local receipt storage without internet reliance.
- Architected a real-time multiplayer synchronization system powered by Supabase, integrating a dynamic debt simplification algorithm that calculates and minimizes total group transactions.
- Developed a high-performance promotional landing page using React, Vite, Tailwind CSS, and GSAP, featuring complex scroll-triggered animations and interactive mobile UI mockups.

RDS AutoBill

May 2026 – Jun 2026

Sales Invoice Generator (Desktop Application)

Freelance Full-Stack Developer (Solo)

- Developed a robust, offline-first desktop sales invoicing application for a local pharmaceutical distributor in Bulacan to streamline daily operations and eliminate manual calculation errors.
- Engineered a zero-latency local architecture using Electron, React, and Vite, integrating better-sqlite3 to ensure reliable, high-performance data management without internet dependency.
- Implemented smart algorithms for automated order computations (subtotals, discounts) and integrated PDFMake to generate instant, customizable, and print-ready professional PDF receipts.

LaborConnect

Nov 2025 – Apr 2026

Labor Union Membership Management (Web Application)

Full-Stack Developer & Project Manager

- Led a 5-member development team in building a full-stack labor union management platform consisting of 3 integrated portals and 10+ core modules.
- Architected a scalable split-deployment ecosystem using React, Node.js, and MySQL, integrating n8n automation for SLA monitoring, AI ticket summaries, and Stripe for payments.
- Won 2nd Best Capstone in the Research Colloquium, achieved the highest overall score from the defense panels, and successfully co-pitched the project.

kAIn

Mar 2025

Smart Dining App (Mobile UI/UX)

UI/UX Designer

- Designed a modern, mobile-first food discovery and smart dining application in Figma, focusing on intuitive navigation, vibrant food cards, and engaging user flows.
- Conceptualized comprehensive user journeys including trending food showcases, seamless checkout screens, and personalized recommendation interfaces under strict time constraints.
- Secured 4th place out of 20+ competing teams in a university hackathon by presenting a highly polished and innovative UI/UX concept.

Sorting Algorithms Visualization (SortAlgo)

Jan 2025

Sorting Algorithms Educational Tool (Web Application)

Full-Stack Developer (Solo)

- Developed a Data Structures and Algorithms visualization tool that demonstrates sorting algorithms through real-time UI animations.
- Architected a deeply decoupled logic structure separating mathematical operations from React DOM rendering to ensure highly responsive playback and speed controls.
- Designed the tool to serve as an interactive academic reviewer and collaborated with a peer to help them understand and implement algorithm visualization logic.

Gcorp.

Dec 2024 – Jan 2025

E-commerce Tech Store (Web Application)

Full-Stack Developer (Solo)

- Engineered a full-stack e-commerce platform using React.js, Express.js, and MySQL with RESTful APIs, JWT authentication, and 2FA.
- Implemented a shopping cart and checkout system supporting voucher validation, inventory synchronization, and secure JWT-based authentication.
- Achieved a perfect 100% score from the reviewing professor in Web Development for delivering a robust, full-featured application.

CSS Generator & Exporter Tools (CSSGen)

Jul 2024

Frontend Styling Tool (Web Application)

Full-Stack Developer (Solo)

- Designed an interactive CSS toolkit containing 8 generators for modern UI effects and layout utilities with real-time previews and one-click exports using React, Vite, and Express.
- Implemented modular generators for Neumorphism, Glassmorphism, Gradients, and Flexbox layouts, providing instant syntax-highlighted output for developers.
- Created the utility to accelerate personal development workflow in future projects while serving as a practical training ground for mastering advanced CSS techniques.

MangaVerse

May 2024 – Jun 2024

Japanese Comics (Manga) Reading App (Mobile UI/UX)

UI/UX Designer (Solo)

- Designed a cinematic manga reading platform concept in Figma, utilizing an anime-inspired dark theme and immersive visual hierarchy.
- Structured responsive reader layouts, intuitive chapter navigation, and comprehensive personal library interfaces focused on digital reading usability.
- Achieved a perfect 100% score from the reviewing professor in Multimedia Authoring & Production for the design's exceptional execution and visual quality.

EDUCATION

Bachelor of Science in Information Technology

Technological University of the Philippines, Manila

Expected Graduation: **Aug 2026**

Magna Cum Laude (Ranked 2nd)

Senior High School (S.T.E.M.)

San Juan de Dios Educational Foundation Inc., Pasay

2020 – 2022

High Honors (Ranked 1st A.Y. 2021)

Junior High School

Parañaque National High School – Baclaran, Parañaque

2016 – 2020

High Honors (Valedictorian)

CERTIFICATIONS

Information and Communication Technology | e-TESDA Online Certification

2026

- Microsoft Artificial Intelligence Course: Azure AI Fundamentals

Computer System Servicing NC II | e-TESDA Online Certification

2025

- Introduction to CSS, Install & Configure Computer Systems, Set-Up Computer Networks and Servers

Visual Graphic Design NC III | e-TESDA Online Certification

2025

- Introduction to Visual Graphic Design, Developing Designs for a Logo
